

Shrubs > 2m

Acacia fimbriata 'Fringed Wattle' - fast growing and spreading shrub to 6m high - dense narrow foliage - yellow flowers in Spring - lives up to 20 yrs - frost hardy.

Callistemon sp. 'Happy Valley' - endemic to Stanthorpe, Qld, this erect shrub grows 4m tall - dark green oval leaves - flower spikes have pink stamens and red anthers and occur in Spring - frost tolerant.

Callistemon sp. 'Injune' - semi-weeping shrub to 3m tall - narrow green leaves - flushes of pale pink brushes several times during the warmer months - hardy in heavy sometimes waterlogged soils - frost resistant.

Callistemon sp. 'Kings Park Special' - bushy shrub to 5m - large red bottlebrushes in Spring - heavy soils - drought tolerant - frost tender when young.

Grevillea sp. 'Elegance' - big bushy shrub to 4m high - long linear and finely divided dark green leaves - large erect spikes of waxy pink flowers occur Winter - Summer - tolerant of drought and medium frost.

Grevillea sp. 'Winpara Gold' - fast growing shrub to 2m - attractive grey green foliage - decorative pink and yellow flower clusters in Winter and Spring - frost tolerant.

Leptospermum petersonii - Lemon - scented Tea Tree - small tree or large shrub to 5m - decorative aromatic leaves - small white flowers early Summer - heavy soils - moderate frosts only.

Melaleuca sp. 'Seafoam' - compact shrub to 3m - narrow linear leaves - a spectacular massed display of pure white brushes occurs in late Spring - hardy in poorly drained soils - moderately frost resistant.

Myoporum bateae - vigorous shrub to 2.5m - dark green pinnate leaves - clusters of tiny pale pink flowers in Summer - moderate frost only.

Shrubs 1 - 2m

Callistemon citrinus 'Rowena' - a hardy rounded shrub to 1.5m high - bright green foliage - dense red brushes with a pink hue during Spring - tolerant of frost and clay soils.

Callistemon citrinus 'White Anzac' - attractive dense shrub to 1.5m - oval green leaves - white bottlebrushes in Spring and Autumn - frost resistant.

Correa sp. 'Coconut Ice' - open shrub to 1m - soft dark green round leaves - pink and white bell shaped flowers in Autumn and Winter - frost tolerant.

Eremophila maculata x racemosa - a compact shrub growing to 2m tall by 2m wide - bright green foliage - yellow buds and pink flowers characterised by fine hairs protruding from the tube occur in Spring and Summer - frost and drought tolerant.

Grevillea sp. 'Big Red' - hardy upright shrub to 2m - small linear dark green leaves - terminal orange/red spider flowers in Spring and Summer - frost resistant.

Grevillea sp. 'Canterbury Gold' - ground covering shrub to 1.5m high x 2m wide - small green pointed leaves - yellow spider flowers in Spring and Summer - frost resistant.

Grevillea sp. 'John Evans' - hardy shrub to 1m - narrow dark green leaves turning reddish in Winter - masses of red spider flowers in Winter and Spring - frost resistant - tolerant of heavy clay.

Grevillea sp. 'Poorinda Rondeau' - spreading shrub to 1.5m high - narrow leaves, reddish in Winter - vivid red flowers in Winter and Spring - frost hardy.

Grevillea rhyolitica - ornamental shrub reaching 1.5m - the green foliage is soft and slightly sticky - large clusters of pendant red flowers throughout the year - sun or semi-shade - moderate frost only.

Shrubs 1 - 2m

Grevillea sp. Rock 'N' Rod - a seedling of *G. sp.* Poorinda Constance growing to 1.2m x 1.2m - a profusion of red flowers are produced Spring till Autumn - frost tolerant.

Grevillea sp. Scarlet Sprite - dense shrub to 2m - green prickly needle like foliage - prolific scarlet flowers in Winter and Spring - frost resistant.

Grevillea sericea Colloroy Plateau - an erect shrub to 1.5m - green oval pointed leaves - dark pink flowers much of the year - frost tolerant.

Isopogon formosus - rounded shrub to 1.5m tall - terete divided leaves - showy terminal heads of pink flowers in Winter & Spring - moderately frost resistant.

Melaleuca sp. Claret Tops - compact bushy shrub to 1.5m tall - fine green foliage with purplish growth tips - small white brushes occur in Spring - moderate frosts only.

Philotheca myoporoides subsp. *acuta* - hardy shrub to 1.5m tall - small green aromatic leaves - pink buds followed by starchy wh. flowers in Spring - frost resistant.

Prostanthera incisa (pink) - Rounded bushy shrub to 1.5m - strongly aromatic toothed foliage - masses of small pink flowers in Spring - dried for use as bush tucker - frost tolerant.

Prostanthera stenophylla (dark purple) - shrub reaching 1m tall - small dark green strongly aromatic leaves - purple flowers in Spring - frost resistant.

Stenanthemum scortechinii - a dense shrub to 1m for rockery or container culture - small pointed leaves - round woolly flower heads surrounded by golden brown bracts in Winter & Spring, ideal for picking & drying - frost resistant.

Shrubs < 1m

Callistemon sp. 'Green Envy' – a dwarf compact form of Callistemon growing 0.5m x 1m – lush green foliage – bright red bottlebrushes in Spring – makes a showy border - tolerant of moderate frost.

Chrysocephalum apiculatum 'Cate's Orange' form – upright perennial forb growing to 0.5m tall – soft grey green foliage – terminal orange billy buttons occur throughout the year – tolerant of dry periods & frost.

Brachyscome microcarpa - dwarf perennial herb - lobed green leaves - amethyst daisies with yellow centres occur from Winter till Summer - prefers dappled shade.

Correa sp. 'Dusky Bells' - hardy spreading shrub to 0.8m - dense green foliage - dark pink bell like flowers in Spring - frost resistant.

Melaleuca thymifolia 'Cotton Candy' - dainty shrub to 1m - fine green foliage - dark pink lacy flowers most of the year - frost resistant.

Pimelea ferruginea 'Magenta Mist' - a dense rounded shrub growing to 1m high - bright green oval leaves grow opposite along the stem - showy terminal heads of pink flowers occur from Spring to Autumn - frost tolerant.

Scaevola aemula - fast growing rounded shrub growing to 40 cm tall - succulent green foliage - purple fan shaped flowers throughout the year - light frosts only - excellent for pot plants - semi shade.

Westringia eremicola (purple) - shrub to 1m - small linear grey green leaves - bright purple flowers occur throughout the year - frost resistant.

Westringia sp. 'Jervis Gem' – this compact dwarf westringia grows to 1m high – linear grey leaves - lilac flowers most of the year – a useful variety for hedging - frost tolerant.

Groundcovers

Allocasuarina glauca (fine leaf prostrate) - a vigorous ground cover to 3m across - useful for growing over a wall - fine dark green foliage - frost resistant.

Goodenia ovata (prostrate) - vigorous groundcover with a diameter of 1.5m - fresh green ovate leaves with toothed margins - yellow flowers most of the year - tolerates frost & some shade.

Grevillea baueri - dense low shrub to groundcover - dark green oval leaves with bronze tones in Winter - red spider flowers in Spring - frost resistant.

Grevillea sp. Bronze Rambler - open vigorous groundcover to 30 cm high x 4m wide - deeply divided leaves with reddish new growth - dark red toothbrush flowers most of the year - tolerates heavy clay - frost resistant.

Grevillea juniperina 'Molonglo' - hardy groundcover - prickly dark green linear leaves - buff yellow spider flowers in Spring and Autumn - frost resistant.

Grevillea juniperina 'Red' - low growing ground cover to 50 cm high by 2m wide - prickly green foliage - blood red spider flowers in Winter and Spring - frost resistant.

Grevillea pinaster (prostrate) - a reliable showy prostrate plant with 3m diameter – lush green foliage – red spider flowers occur over many months – frost & draught tolerant.

Leptospermum sp. 'Pink Cascade' - a hardy groundcover reaching 50 cm in height & a diameter of 1.5m - weeping branches of small green pointed leaves - shrub becomes covered in pink blossom in Spring - frost resistant.

Rhaqodia spinescens 'Grey Saltbush' - prostrate groundcover to 1.5m across - soft silver foliage - tiny red berries in Summer - tolerates drought and frost.

2017 PLANT DRIVE

Funds raised go towards purchasing food and equipment for the orphaned, sick or injured native animals and birds in our care.

Ordering details can be found on the official order form at www.gbwildlifecarers.org.au.

Orders due 31 July.

Pick up - 9 Sept - Broadwater hall - 7am-11am.

Trees

Eucalyptus acaciiformis - Wattle leaved peppermint - fast growing windbreak tree reaching 15m - fine dense bluish foliage resistant to insect attack - withstands frost and snow.

Eucalyptus cinerea - Argyle apple - hardy fast growing tree to 12m - bushy crown of bluish foliage grown for floral arrangements - reddish fibrous bark - cream flowers in Autumn and Winter - tolerates poor drainage - frost tolerant.

Eucalyptus scoparia - Wallangarra white gum - fast growing ornamental tree to 15m - smooth straight white trunk - willow like olive green foliage - frost and drought resistant.

Eucalyptus sideroxylon - Mugga ironbark - tree to 20m - pendulous grey-green foliage - pink blossom Spring and Autumn – grows well in clay soils and is frost tolerant - useful timber.

Melaleuca linariifolia - Snow in Summer - small tree to 10m - papery bark - fine dense foliage - profuse lacy white flowers in Summer - suited to poorly drained sites – frost tolerant.

Melaleuca styphelioides - Prickly-leaved paperbark – attractive symmetrical tree to 10m - small prickly leaves - spongy bark and small cream brushes in Summer - tolerates poor drainage and saline soils - frost resistant.
